The ATS is a leading medical association dedicated to advancing pulmonary, critical care and sleep medicine. Its members prevent and fight respiratory disease around the globe through patient care, research, education and advocacy.

Society members include more than 15,000 physicians, base scientists, translational researchers, nurses, nurse practitioners, respiratory therapists and other allied healthcare professionals, 30 percent of whom work in countries other than the U.S. Among the specialties they represent are adult and pediatric pulmonology, critical care medicine, sleep medicine, infectious diseases, allergy/immunology, behavioral science, public health, environmental and occupational medicine, neonatology and thoracic surgery.

Through its three peer-reviewed journals—including the *American Journal of Respiratory and Critical Care Medicine (AJRCCM)*, the *American Journal of Respiratory Cell and Molecular Biology (AJRCMB)*, and *Proceedings of the American Thoracic Society (PATS)*—the ATS supports the dissemination of groundbreaking research. The AJRCCM has the highest impact factor in the field of respiratory medicine.
